Rating Report

AVAX - Avalanche

DECEMBER 2024

Free report

Issued by

c4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1.   Basic information
2.   Analysis
3.   Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

AVAX (Avalanche) is a cryptocurrency created by Ava Labs, focusing on building a highly scalable blockchain platform. Its primary purposes are:

- Transaction fees. Used to pay for all transactions and operations within the Avalanche network, similar to how ETH works on Ethereum.
- Network Security. AVAX is used in staking to secure the network, where validators must stake a minimum amount of AVAX tokens to participate in consensus.
- Subnet Creation. Required for creating custom blockchains (called Subnets) on Avalanche, where operators must stake AVAX to validate subnet transactions.

The token has established itself as a fundamental component of the Avalanche ecosystem, powering everything from DeFi applications to enterprise blockchain solutions.

2. Analysis

In the following table we will show the different areas researched, such as tech, strategy and economy.

AVAX - Avalanche						
Tech	**Type**	Cryptocurrency		Token		Others	
	Layer	**0**	1	2	3	Others	
	Blockchain	Bitcoin	Ethereum	Solana	BNB Chain	**Others**	
	Category	**Utility**	Security	Stable	Meme	Others	
	Consensus	PoW	**PoS**	PoA	PoB	Others	
	ISO	Yes			**No**		
	Audits	**Yes**			No		
	Auto Audit(1)	0	1	2	**3**	4	5
Strategy	**Roadmap**	**Yes**			No		
	Partnerships	**Yes**			No		
	Team	**Yes**			No		
	Social media	Abandoned		**Active**		Others	
	CAPED(2)	0	1	**2**	3	4	5
Economy	**Supply**	**Limited**			Infinite		
	Burn	**Yes**			No		
	Collateral	Yes			**No**		
	Tokenomics(3)	0	1	2	3	**4**	5

(*) The table structure might be subject to changes if the project demands customization

Overall, the analysis has been carried out very satisfactorily.

On the one hand, the tech block shows that AVAX is a layer 0 cryptocurrency with a Proof of Stake consensus protocol. This makes it independent, innovative, and scalable, thanks to its unique architecture built on its own blockchain, offering high throughput and quick finality.

The project demonstrates strong technical credibility as a utility token with audits from reputable firms like Halborn and CertiK. However, like many blockchain projects, it lacks ISO certifications, which prevents it from achieving a perfect score in this technical block.

On the other hand, regarding the strategy block, AVAX shows remarkable strength. With a clear public roadmap, transparent team structure, and impressive partnerships with industry giants like Deloitte, AWS, and Mastercard, it demonstrates serious institutional adoption potential. The project maintains highly active social media presence, showing strong community engagement and continuous development.

Finally, examining the token economy, AVAX presents a robust tokenomics model. With a limited supply and implemented burn mechanism, it maintains a deflationary characteristic. While it doesn't have collateral backing, its strong tokenomics score of 4/5 reflects well-designed economic incentives that align with network security and utility through staking mechanisms.

*(1) The auto audit score is performed by 5 different digital audits: Quick Intel, Go Plus, Honeypot, Token Sniffer and StaySAFU through the DEXTools app.
*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken.
*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
