Rating Report

TRX - TRON

DECEMBER 2024

Free report

Issued by

c4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

TRX (TRON) is a cryptocurrency created by Justin Sun and the TRON Foundation in 2017. Its primary purposes are:

- Network Operations. Powers transactions and smart contracts on the TRON network, which aims to be a high-throughput, low-cost blockchain platform.
- Content Distribution. Facilitates decentralized content sharing and digital entertainment distribution.
- DeFi Ecosystem. Supports various decentralized finance applications, including staking, lending, and trading on the TRON blockchain.

The token has transformed from an ERC-20 token on Ethereum to become the native cryptocurrency of its own blockchain, now serving as the foundation for a large Web3 entertainment and DeFi ecosystem.

2. Analysis

In the following table we will show the different areas researched, such as tech, strategy and economy.

TRX - TRON						
Tech	**Type**	Cryptocurrency		Token		Others	
	Layer	0	**1**	2	3	Others	
	Blockchain	Bitcoin	Ethereum	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Audits	Yes			No		
	Auto Audit(1)	0	1	2	3	4	5
Strategy	**Roadmap**	Yes			No		
	Partnerships	Yes			No		
	Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED(2)	0	1	2	3	4	5
Economy	**Supply**	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Tokenomics(3)	0	1	2	3	4	5

(*) The table structure might be subject to changes if the project demands customization

Overall, the analysis of TRX shows strong fundamentals across key areas.

The tech block reveals TRX as a layer 1 cryptocurrency with Delegated Proof of Stake consensus, operating on its own blockchain (TRON). This architecture enables high throughput and low transaction costs. While it has security audits from reputable firms like SlowMist and Certik, it lacks ISO certification, which impacts its technical score.

In the strategy block, TRX demonstrates strong market presence with a clear public team, established partnerships with major companies like Samsung and VISA, and maintains active social media engagement. The project maintains a public roadmap, showing continued development commitment.

Regarding tokenomics, TRX implements an unlimited supply model with a burn mechanism, contributing to some potential value preservation. Though it lacks collateral backing, the overall tokenomics structure earns a 2/5 rating, reflecting medium economic design principles.

*(1) The auto audit score is performed by 5 different digital audits: Quick Intel, Go Plus, Honeypot, Token Sniffer and StaySAFU through the DEXTools app.

*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken.

*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
