Issued by

The logo for C4R, consisting of the letters 'C4R' in a bold, white, sans-serif font, centered within a dark gray square.

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

---

## 1. Basic information

NEAR Protocol (NEAR) is a Layer 1 blockchain platform designed to be developer and user-friendly. Its primary purposes are:

- Network Operations. NEAR tokens are used to pay for transaction fees and storage on the NEAR blockchain, similar to how ETH works on Ethereum.
- Staking and Validation. Token holders can stake NEAR to become validators or delegate their tokens to validators, participating in the network's Proof-of-Stake consensus mechanism and earning rewards.
- Governance: NEAR holders can participate in protocol governance decisions through the NEAR Foundation.
- Developer Economy: The token supports the platform's developer-friendly ecosystem, where developers can earn rewards in NEAR for their contributions.

The protocol has become a major player in the Web3 space, particularly known for its unique sharding technology called Nightshade and its focus on user accessibility through human-readable account names and progressive security.

## 2. Analysis

In the following table we will show the different areas researched, such as tech, strategy and economy.

NEAR - Near Protocol							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Bitcoin	Ethereum	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Audits	Yes			No		
	Auto Audit <sup>(1)</sup>	0	1	2	3	4	5
Strategy	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED <sup>(2)</sup>	0	1	2	3	4	5
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Tokenomics <sup>(3)</sup>	0	1	2	3	4	5

(\*) The table structure might be subject to changes if the project demands customization

Overall, the analysis has been carried out very satisfactorily.

On the one hand, the tech block shows that NEAR is a layer 1 cryptocurrency with a Proof of Stake consensus protocol. This makes it independent and efficient, being hosted on its own blockchain rather than relying on other platforms. The NEAR Protocol's design prioritizes scalability and user-friendliness through its unique sharding technology.

However, although it is a digital asset categorized as 'utility' with multiple respected audits from companies like Blocksec or Hacken, it has not been subject to ISO certifications. This aspect prevents it from achieving a higher score in the technical block, though the multiple thorough audits demonstrate a strong commitment to security.

On the other hand, with regard to the strategy block, the project demonstrates strong fundamentals. With a clear public roadmap, transparent team structure, and significant partnerships including major players like Aurora and even the United Nations, NEAR shows a robust strategic approach. Their active social media presence and community engagement further reinforce their commitment to transparency and community building.

Finally, looking at the token economy, NEAR has a limited supply which typically helps maintain value over time. However, unlike some competitors, it lacks a burn mechanism or collateral backing. Despite these aspects, the overall tokenomics score remains strong at 3 out of 5, reflecting solid economic design principles and utility within the ecosystem.

\*(1) The auto audit score is performed by 5 different digital audits: Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app.

\*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken.

\*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools.

---

### 3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(\*) Note: Rating is from AAA+ to C- scoring.
