Issued by

C4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

SUI is the native cryptocurrency of the Sui Network, developed by Mysten Labs (founded by former Meta/Facebook engineers who worked on the Diem blockchain project). Its primary purposes are:

- Transaction fees. Used to pay for gas fees and processing costs on the Sui blockchain network.
- Network security. Serves as the staking token for validators who help secure and maintain the network through a Proof-of-Stake consensus mechanism.
- Governance utility.
- Enables holders to participate in the network's governance by voting on protocol upgrades and changes.

The token functions as the backbone of the Sui ecosystem, which is designed for high-throughput and low-latency blockchain applications, particularly focused on gaming, social media, and DeFi applications with its parallel transaction processing capabilities.

2. Analysis

In the following table we will show the different areas researched, such as tech, strategy and economy.

SUI - Sui							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Bitcoin	Ethereum	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Audits	Yes			No		
	Auto Audit ⁽¹⁾	0	1	2	3	4	5
Strategy	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED ⁽²⁾	0	1	2	3	4	5
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Tokenomics ⁽³⁾	0	1	2	3	4	5

(*) The table structure might be subject to changes if the project demands customization

Overall, the analysis has been carried out very satisfactorily.

On the one hand, the tech block shows that the project is a layer 1 cryptocurrency with a Proof of Stake consensus protocol. This makes it independent, innovative and efficient respectively, thanks to its parallel transaction processing capabilities and being hosted on its own blockchain, the Sui Network. The project's technical foundation is particularly strong, having been developed by former Meta engineers who worked on the Diem blockchain project.

Moreover, being a digital asset categorized as 'utility' with comprehensive audits executed by multiple reputable firms (Certik and OtterSec), it demonstrates a strong commitment to security. However, it has not been subject to ISO certifications, which prevents it from achieving a higher score in this block.

On the other hand, regarding the strategy block, the project demonstrates strong fundamentals with a clear, public roadmap and an impressive array of partnerships including tech giants like Google Cloud and Alibaba Cloud. The public team, active social media presence, and strategic partnerships with established players like Circle and Jump Crypto all contribute to its credibility and market position.

Finally, looking at the token economy, SUI demonstrates solid tokenomics with a limited supply and an implemented burn mechanism. While it doesn't have collateral backing, the overall tokenomics structure, combined with its utility in network governance and transaction fees, justifies an average score of 3 out of 5. The combination of a deflationary mechanism and limited supply suggests a well-thought-out economic model.

*(1) The auto audit score is performed by 5 different digital audits: Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app.

*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken.

*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
