Issued by

c4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1.   Basic information
2.   Analysis
3.   Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

GT (GateToken) is the native utility token of Gate.io, a global cryptocurrency exchange known for its extensive range of trading services and robust security features. Its primary purposes and functionalities are:

- **Trading fee discount**. Users who hold and utilize GT to pay for trading fees on Gate.io enjoy significant discounts, incentivizing adoption and long-term holding.
- **Ecosystem utility**. It can be used for participating in initial exchange offerings (IEOs), staking to earn rewards, and accessing premium features such as higher withdrawal limits or exclusive market data. This multifunctionality enhances its demand and practical value.

Originally launched as a simple utility token for the Gate.io exchange, GT has evolved into a multifaceted asset with various applications spanning. Its growth reflects Gate.io's ambition to create a comprehensive web3 ecosystem where GT acts as the primary medium of exchange, governance, and value accrual.

2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

GT						
Type	Cryptocurrency		**Token**		Others	
Layer	0	1	2	**3**	Others	
Blockchain	Ethereum	Cosmos	Solana	BNB Chain	Others	
Category	Utility	Security	Stable	Meme	Others	
Consensus	PoW	**PoS**	PoA	PoB	Others	
ISO	Yes			**No**		
Bug Bounty	**Yes**			No		
Audits	**Yes**			No		
Auto Audit (1)	0	1	2	3	4	5

(Note: "Tech" label spans the left of the table rows.)

*(1) The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, Honeypot, Token Sniffer and StaySAFU through the DEXTools app

On the one hand, the tech block reveals that GT operates as a Layer 3 token with a Proof of Stake (PoS) consensus inherited from Ethereum, combining interoperability with energy efficiency. Its technical credibility is strengthened by a bug bounty program hosted on HackenProof and a security audit conducted by Hacken.

However, the absence of an ISO certification still limits its score in this block despite these improvements.

GT			
Strategy	**Governance**	**Centralized**	Decentralized	Others
	Open Source	**Yes**		No
	Roadmap	Yes		**No**
	Partnerships	**Yes**		No
	Public Team	**Yes**		No
	Social media	Abandoned	**Active**	Others
	CAPED (2)	0 | 1	2 | **3**	4 | 5

*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken

On the other hand, the strategy block benefits from GT's association with Gate.io's established ecosystem, with a fully public team, active social media engagement and partnerships (such as HipoDeFi and NFT Box) add to its credibility, though the lack of a public roadmap or open-source development remains a strategic gap compared to fully decentralized projects.

GT		
Economy	**Supply**	**Limited**	Infinite
	Burn	**Yes**	No
	Collateral	Yes	**No**
	Buybacks	**Yes**	No
	Tokenomics (3)	0 | 1 | 2	3 | **4** | 5

*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools

Finally, the token economy remains one of GT's strongest aspects. Its limited supply, quarterly buyback-and-burn mechanism (funded by 15% of Gate.io's revenue), and absence of collateral create a balanced deflationary model. These factors secure it a high tokenomics rating, reflecting thoughtful economic design.

Overall, the analysis has been carried out satisfactorily.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

BBB+

(*) Note: Rating is from AAA+ to C- scoring.
