Issued by

C4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

AERO (Aerodrome Finance) is a cryptocurrency native to the Aerodrome Finance platform, which operates as a decentralized exchange (DEX) and liquidity hub built on the Base blockchain, an Ethereum Layer 2 solution. Its primary purposes and features include:

- **Governance.** AERO holders have the right to participate in the decision-making processes of the Aerodrome Finance platform..
- **Liquidity Incentives.** AERO is used to reward liquidity providers (LPs) who deposit their assets into Aerodrome's liquidity pools. These incentives help ensure sufficient liquidity for efficient trading, reducing slippage and improving the overall user experience.
- **Fee Reduction.** Similar to other DEX tokens, AERO may offer reduced trading fees or other benefits to users who hold or stake the token.

In summary, AERO is more than just a governance token—it's a dynamic asset tied to the growth and sustainability of Aerodrome Finance. Its design encourages active participation, liquidity provision, and decentralized governance, making it a key player in the Base ecosystem.

2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

| AERO | | | | | | | |
|------|---------------------------|----------------|----------|--------|-----------|--------|---|
| Tech | Type | Cryptocurrency | | Token | | Others | |
| | Layer | 0 | 1 | 2 | 3 | Others | |
| | Blockchain | Ethereum | Cosmos | Solana | BNB Chain | Others | |
| | Category | Utility | Security | Stable | Meme | Others | |
| | Consensus | PoW | PoS | PoA | PoB | Others | |
| | ISO | Yes | | | No | | |
| | Bug Bounty | Yes | | | No | | |
| | Audits | Yes | | | No | | |
| | Auto Audit ⁽¹⁾ | 0 | 1 | 2 | 3 | 4 | 5 |

*(1) The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app

On the tech side, AERO operates as a layer 2 utility token built on the Base blockchain, which is part of the Ethereum ecosystem. It uses a lock governance system rather than traditional consensus mechanisms. In addition, it's key to notice that the project is undergoing a bug bounty program in ImmuneFi.

On the other hand, the project has been audited by both Spearbit and Chainsecurity, adding credibility, though it lacks ISO certification which affects its score in this category.

| AERO | | | | | | | |
|----------|----------------------|-------------|---|---------------|----|--------|---|
| Strategy | Governance | Centralized | | Decentralized | | Others | |
| | Open Source | Yes | | | No | | |
| | Roadmap | Yes | | | No | | |
| | Partnerships | Yes | | | No | | |
| | Public Team | Yes | | | No | | |
| | Social media | Abandoned | | Active | | Others | |
| | CAPED ⁽²⁾ | 0 | 1 | 2 | 3 | 4 | 5 |

⁽²⁾ The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken

In terms of strategy, Aerodrome Finance shows strengths with its decentralized governance model, though it currently lacks a public roadmap. While the team remains anonymous, the project maintains active social media presence and has formed important partnerships with Synthetix, Ether Fi and Wormhole within the Base ecosystem. The existence of a bug bounty program through Immunefi demonstrates commitment to security.

| AERO | | | | | | | |
|---------|---------------------------|---------|---|---|----------|---|---|
| Economy | Supply | Limited | | | Infinite | | |
| | Burn | Yes | | | No | | |
| | Collateral | Yes | | | No | | |
| | Buybacks | Yes | | | No | | |
| | Tokenomics ⁽³⁾ | 0 | 1 | 2 | 3 | 4 | 5 |

⁽³⁾ The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools

The tokenomics present challenges - AERO has an infinite supply and notably lacks both a burn mechanism and collateral backing. These factors, combined with limited utility beyond basic governance functions, result in a tokenomics score of just 1 out of 5.

Overall, the analysis has been carried out satisfactorily.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
