Issued by

C4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

FLOW is a token and blockchain platform designed to support the next generation of decentralized applications (dApps), games, and digital assets. Created by Dapper Labs, this asset is built to address scalability and usability challenges in the blockchain space. Its primary purposes are:

- **Scalable Blockchain Infrastructure.** FLOW is a high-performance blockchain optimized for scalability without sharding, enabling fast and low-cost transactions.
- **Support for NFTs and Digital Collectibles.** FLOW is the backbone of major NFT platforms, including NBA Top Shot, NFL All Day, and UFC Strike. It provides a seamless experience for creators and users to mint, trade, and interact with non-fungible tokens (NFTs).
- **Ecosystem Utility.** The FLOW token is used for various functions within the ecosystem, including paying for transaction fees, staking to secure the network, and participating in governance decisions.

The FLOW token has evolved from a niche cryptocurrency into a key player in the NFT and gaming ecosystems. Its focus on usability, scalability, and partnerships positions it as a leading platform for the future of decentralized applications and digital ownership.

2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

FLOW							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Ethereum	Cosmos	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Bug Bounty	Yes			No		
	Audits	Yes			No		
	Auto Audit ⁽¹⁾	0	1	2	3	4	5

⁽¹⁾ The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app

On the one hand, the tech block reveals FLOW as a Layer 1 token with a Proof of Stake consensus protocol, designed for scalability and high-performance applications like NFTs and gaming. Its independence is reinforced by operating on its native Flow blockchain.

While it lacks ISO certification, its technical rigor is demonstrated through audits by reputable firms like Kudelski, Halborn, and Oak Security, as well as a bug bounty program hosted on HackenProof—factors that bolster its security credentials.

FLOW							
Strategy	Governance	Centralized		Decentralized		Others	
	Open Source	Yes			No		
	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Public Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED ⁽²⁾	0	1	2	3	4	5

⁽²⁾ The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken

On the other hand, the strategy block highlights FLOW's maturity as a project. With a public team (Dapper Labs), high-profile partnerships (NBA, NFL, Warner Music), and active social media engagement, it exemplifies a well-executed ecosystem play. The presence of a public roadmap and decentralized governance further cements its credibility, though the absence of a buyback program or token burn mechanism is noted.

FLOW							
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Buybacks	Yes			No		
	Tokenomics ⁽³⁾	0	1	2	3	4	5

⁽³⁾ The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools

Finally, the token economy presents a balanced picture. FLOW's infinite supply is offset by its utility as collateral in DeFi and staking rewards. While it lacks deflationary mechanisms, its strong adoption in entertainment and NFTs justifies a high tokenomics score, reflecting real-world demand over artificial scarcity.

Overall, the analysis has been carried out satisfactorily.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
