Issued by

c4r

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

1. Basic information

IP (Story) is a cryptocurrency designed to empower creators and digital content producers by leveraging blockchain technology. In fact, IP (Story) integrates mainly intellectual property (IP) rights and content monetization. Its primary purposes include:

- **Content Ownership and Monetization.** IP (Story) enables creators to tokenize their work, ensuring verifiable ownership and direct monetization.
- **Decentralized Storytelling.** The token is used within decentralized applications (dApps) that allow collaborative storytelling, where contributors are rewarded with IP tokens for their participation.
- **Royalty Distribution.** Smart contracts embedded in IP (Story) automate royalty payments, ensuring that creators receive fair compensation whenever their work is resold, adapted, or reused.
- **Governance and Voting.** Holders of IP (Story) can participate in platform governance, influencing decisions related to platform upgrades, content curation, and community rewards.

Originally conceived as a niche token for digital writers, IP (Story) has expanded into a multifaceted cryptocurrency. Its innovative approach to intellectual property and collaborative content creation positions it as a key player in the evolving web3 landscape.

2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

IP							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Ethereum	Cosmos	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Bug Bounty	Yes			No		
	Audits	Yes			No		
	Auto Audit ⁽¹⁾	0	1	2	3	4	5

(1) The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app*

On the technical side, IP (Story) operates as a Layer 1 cryptocurrency with a Proof-of-Creativity (PoC) consensus protocol. This unique system rewards users based on their creative contributions and participation in the ecosystem.

While categorized as a utility token and having completed security audits by Halborn, the absence of ISO certification slightly impacts its technical score. The project does maintain a bug bounty program to enhance platform security.

IP							
Strategy	Governance	Centralized		Decentralized		Others	
	Open Source	Yes			No		
	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Public Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED ⁽²⁾	0	1	2	3	4	5

(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken*

From a strategic perspective, IP (Story) demonstrates strong fundamentals. It actively engages through social media channels and has established partnerships with notable firms including Andreessen Horowitz, Hashed, and Polychain Capital. The transparency of its team and published roadmap contribute to the project's credibility.

As a newer initiative in the space, its long-term development trajectory remains to be fully realized.

IP							
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Buybacks	Yes			No		
	Tokenomics ⁽³⁾	0	1	2	3	4	5

(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools*

Regarding token economics, IP (Story) implements an infinite supply model balanced by a burn mechanism to address inflationary pressures. The token serves multiple functional purposes including content ownership verification, royalty distribution, and ecosystem governance.

While it doesn't feature collateral backing or a buyback program, these utility aspects support its tokenomics, earning it a rating of 3/5.

Overall, the analysis has been carried out satisfactorily.

3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(*) Note: Rating is from AAA+ to C- scoring.
