Issued by

**C4r**

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

---

## 1. Basic information

ASTER is the native utility token of the Aster protocol, powering one of the fastest-growing decentralized perpetual and spot trading platforms in DeFi. Developed following the merger of Astherus, a multi-asset yield protocol, and APX Finance, a leading perpetuals decentralized exchange, Aster officially rebranded and launched its token in 2025. Its primary purposes are:

- **Trading fee discounts.** Holders of ASTER enjoy significant reductions in trading fees when executing spot and perpetual contracts on the Aster DEX, making high-volume trading more cost-effective and accessible for all users.
- **Governance and Staking.** ASTER token holders can stake and vote on key protocol decisions and earn a share of the platform's trading revenue.

The token has evolved rapidly to a focused perpetuals and spot platform has expanded through major milestones including record trading volumes, strategic token burns, integration of yield tools, and setting the stage for the Aster Chain expansion that will unlock even broader use cases in decentralized finance.

## 2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

ASTER							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Ethereum	Cosmos	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Bug Bounty	Yes			No		
	Audits	Yes			No		
	Auto Audit (1)	0	1	2	3	4	5

\*(1) The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app

On the one hand, the tech block shows that the project is a token transitioning from layer 3 to layer 1 with a PoSA consensus protocol built on BNB Chain as its current main blockchain. This makes it scalable and efficient respectively, thanks to the upcoming own Aster Chain and privacy features while inheriting the existing infrastructure.

However, although it is a digital asset categorized as utility with its respective audit executed by PeckShield and Salusec, it has not been subject to ISO certifications, it features a bug bounty program on Immunefi, open source code available on its GitHub repository, and governance transitioning to decentralized, some of these transitional aspects along with no collateral prevent it from achieving a higher score in this block.

ASTER							
Strategy	Governance	Centralized		Decentralized		Others	
	Open Source	Yes			No		
	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Public Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED (2)	0	1	2	3	4	5

\*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken

On the other hand, with regard to the strategy block, being an evolving project post its 2025 launch, it maintains a public roadmap, public partnerships with YZi Labs, active social media accounts, while having no public team and governance still transitioning to decentralized. This project is very influenced by YZi Labs (formerly Binance labs) and it is a response to Hyperliquid success, projects like this with strong ecosystem focus and open source elements truly stand out in this type of block.

ASTER							
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Buybacks	Yes			No		
	Tokenomics (3)	0	1	2	3	4	5

\*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools

Finally, let's look at the token economy. Knowing that ASTER has a limited supply, there is a burn mechanism, a buyback program funded by platform fees, and no collateral, our tokenomics score receives a solid rating of 4 out of 5.

Overall, the analysis has been carried out satisfactorily.

---

### 3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(\*) Note: Rating is from AAA+ to C- scoring.
