Issued by

**C4r**

The purpose of this report is to gather all the important characteristics of the cryptocurrency or token. The report is performed in the following order:

1. Basic information
2. Analysis
3. Conclusion

Note that the result of this report should be interpreted as an independent analysis, not as a signal to buy or sell an asset. Please, always DYOR.

---

## 1. Basic information

GNO (Gnosis) is the native cryptocurrency and governance token of the Gnosis ecosystem, originally launched in 2017 as a decentralized prediction market platform built on the Ethereum network. Its primary purposes are:

- **Decentralized Governance and Staking.** GNO serves as the crucial asset used to secure the Gnosis Chain, which is an independent, Ethereum-compatible layer-1 blockchain previously known as the xDai Chain. Validators must stake GNO tokens to participate in the network's consensus mechanism, process blocks, and earn staking rewards, thereby keeping the infrastructure highly decentralized and secure through GnosisDAO.
- **Ecosystem Incubation and Utility.** While everyday transaction gas fees on the Gnosis Chain are actually paid using a pegged stablecoin called xDai, GNO remains the strategic anchor of a massive suite of web3 products.

The coin has evolved drastically from its original vision as a specialized prediction market asset. Today, GNO has transformed into a comprehensive infrastructure cryptocurrency that governs an entire layer-1 blockchain and supports some of the most critical decentralized finance applications in the web3 space.

## 2. Analysis

In the following tables we will show the different areas researched, such as tech, strategy and economy.

GNO							
Tech	Type	Cryptocurrency		Token		Others	
	Layer	0	1	2	3	Others	
	Blockchain	Ethereum	Cosmos	Solana	BNB Chain	Others	
	Category	Utility	Security	Stable	Meme	Others	
	Consensus	PoW	PoS	PoA	PoB	Others	
	ISO	Yes			No		
	Bug Bounty	Yes			No		
	Audits	Yes			No		
	Auto Audit (1)	0	1	2	3	4	5

\*(1) The auto audit score is performed by 6 different digital audits: Certik Skynet, Quick Intel, Go Plus, HoneyPot, Token Sniffer and StaySAFU through the DEXTools app

On the one hand, the tech block shows that the project is a layer 1 cryptocurrency with a Proof of Stake consensus protocol. This makes it independent, innovative and efficient respectively, thanks to the low fees and being hosted on its own blockchain, the Gnosis Chain, which was built on Ethereum.

However, although it is a digital asset categorized as utility with its respective audits executed by cybersecurity companies like ConsenSys Diligence, OpenZeppelin, and ChainSecurity, it has not been subject to ISO certifications, so this aspect prevents it from achieving a higher score in this block. It is important to note that the project is open source, with its code publicly available on Github, and it maintains a bug bounty program to ensure its security.

GNO							
Strategy	Governance	Centralized		Decentralized		Others	
	Open Source	Yes			No		
	Roadmap	Yes			No		
	Partnerships	Yes			No		
	Public Team	Yes			No		
	Social media	Abandoned		Active		Others	
	CAPED (2)	0	1	2	3	4	5

\*(2) The CAPED score is an analysis of capitalization, trader's activity, price performance, development and engagement. This analysis was deployed initially by the Alpha Intelligence team of Hacken

On the other hand, with regard to the strategy block, being an already consolidated project, it is normal for the score to be high, and the presence of a public roadmap and active social media accounts is a positive sign. Projects like this with a public team, excellent partnerships with entities like Balancer and Consensys, and a decentralized governance model through GnosisDAO are the ones that truly stand out in this type of block.

GNO							
Economy	Supply	Limited			Infinite		
	Burn	Yes			No		
	Collateral	Yes			No		
	Buybacks	Yes			No		
	Tokenomics (3)	0	1	2	3	4	5

\*(3) The tokenomics score is performed by COIN4RATING considering factors as supply, burn mechanism, distribution, vesting and possibility of staking/liquidity pools

Finally, let's look at the token economy. Knowing that GNO has a limited supply and a burn mechanism, there is a deflationary strategy. While the token does not have collateral, it does feature a buyback program driven by the DAO. Considering these factors, our tokenomics score reaches a value of 4.

Overall, the analysis has been carried out satisfactorily

---

### 3. Conclusion

The report provides a comprehensive yet concise analysis of the project's key characteristics. After thorough investigation, we confidently assess the project's performance as achieving the following rating:

(\*) Note: Rating is from AAA+ to C- scoring.
